SUMMARY

Full Stack Engineer with 2+ years building AI products end to end, from PostgreSQL and Node.js services to React, Next.js, Electron and Flutter apps. Shipped LLM-powered platforms for multi-channel outreach and meeting intelligence, plus the unglamorous parts that make them products: OAuth integrations, telephony, job queues, safe retries and CI/CD. Core stack: React, Next.js, Node.js, TypeScript, PostgreSQL, Redis and AWS.

SKILLS

Languages: TypeScript, JavaScript, SQL, Dart, HTML5, CSS3, Sass
Frontend: React.js, Next.js, Redux Toolkit, Zustand, TanStack Query, Tailwind CSS, Electron, Flutter
Backend: Node.js, Express.js, REST APIs, Microservices, BullMQ, Sequelize, OAuth 2.0, Webhooks
Real-Time & AI: WebSockets, Socket.IO, SSE, WebRTC (LiveKit), MQTT, LLM integration, Speech-to-Text (Deepgram)
Integrations: Gmail API, Microsoft Graph, Google Calendar, Zoom, Twilio, Chrome Extensions (MV3), Web Scraping
Cloud & DevOps: AWS (EC2, S3, Lambda, RDS, IAM), PostgreSQL, Redis, Docker, Jenkins, GitHub Actions, Vercel

EXPERIENCE

Oct 2024 – Present **Full Stack Engineer** **QLU.ai**

- Owned end-to-end development of QLU's AI multi-channel outreach platform, from PostgreSQL schemas and Node.js services to the React app and Chrome extension features.
- Built QLU's AI meeting assistant end to end: meeting bots, phone capture, live transcription, AI notes and call-prep briefs, on a Next.js front end and Node.js back end.
- Built real-time features for QLU World desktop (Electron, React), QLU World mobile (Flutter) and QLU Social (Flutter): LiveKit audio and video, screen sharing and MQTT/WebSocket chat.
- Designed Node.js, Express and TypeScript APIs on PostgreSQL with Redis and BullMQ, tuned one API to return 80,000+ records per call, and set up CI/CD with GitHub Actions, Jenkins and Docker.

Aug 2024 – Oct 2024 **Fellowship Associate, Full Stack Development** **CodeHuddle**

- Shipped responsive Next.js and React features styled with Tailwind CSS and wired to Node.js APIs.
- Wrote unit tests that raised coverage on Gymyg, the company's flagship product.

May 2024 – Jul 2024 **Full Stack Developer** **Funsol Technologies**

- Shipped React and Node.js analytics dashboards for product stats, VPN usage and business KPIs, re-architected data fetching to cut load times, and built reusable UI components.

PROJECTS

Outreach **AI multi-channel outreach platform** React · Node.js · PostgreSQL · Redis · BullMQ

- Built the platform end to end: a React campaign builder, Node.js services on PostgreSQL, and BullMQ workers that run multi-round sequences across LinkedIn, InMail, Gmail and Outlook.
- Added AI that writes each message for its prospect and sorts every reply into six intents, with a cross-channel stop that ends all follow-ups the moment someone answers.
- Designed the Message Hub, one idempotent API for every send and reply, and integrated Gmail and Microsoft Graph over OAuth 2.0 with threading and bounce detection.
- Built Chrome extension features that scrape LinkedIn and Recruiter profiles, conversations and InMail credits, and run invites, messages and InMail pushed over Socket.IO.

Transcriber **AI meeting assistant** Next.js · Node.js · PostgreSQL · Redis · Twilio

- Built it end to end: calendar-synced bots join Google Meet, Zoom and Teams calls on their own, plus join-by-link, Twilio phone capture with caller-ID verification and 4 GB uploads.
- Turned each call into speaker-labelled transcripts, AI summaries and per-attendee notes in custom templates, refined in an "Edit with AI" chat with version history.
- Shipped live transcription with an in-call AI coach over Deepgram, Redis and Socket.IO, plus AI call-prep briefs with attendee and company research, sharing and PDF export.

EDUCATION

2020 – 2024 **Bachelor of Science in Computer Science** **FAST-NUCES**

CERTIFICATIONS, AWARDS & PUBLICATIONS

2024 **AWS Academy Graduate: AWS Academy Cloud Foundations** **Amazon Web Services**

2024 **Outstanding Solution Implementation award, CV Projects Expo** **Ready Tensor**

2025 **Book chapter, Springer Nature (co-author):** Generative AI-Based Approach for Scalable and Cost-Effective Sustainable Urban Planning Using Satellite Imagery
